

## EXTENDED DEMO FOR VEGETATION STUDIO PRO

There is an extended version of the Vegetation Studio Pro demo available. It requires 3 simple steps to install.

1. Install the free Speedtree package from the asset store

**<https://assetstore.unity.com/packages/3d/vegetation/speedtree/free-speedtrees-package-29170>**

2. Download and install **this** package.

3. Run the demo scene.

This should get you started. All documentation is available online on this website and in a pdf document included with the asset.

If you have any problems open as support ticket (register on this website), join our **Skype** or **Discord** text chats or look at the unity **forum**.

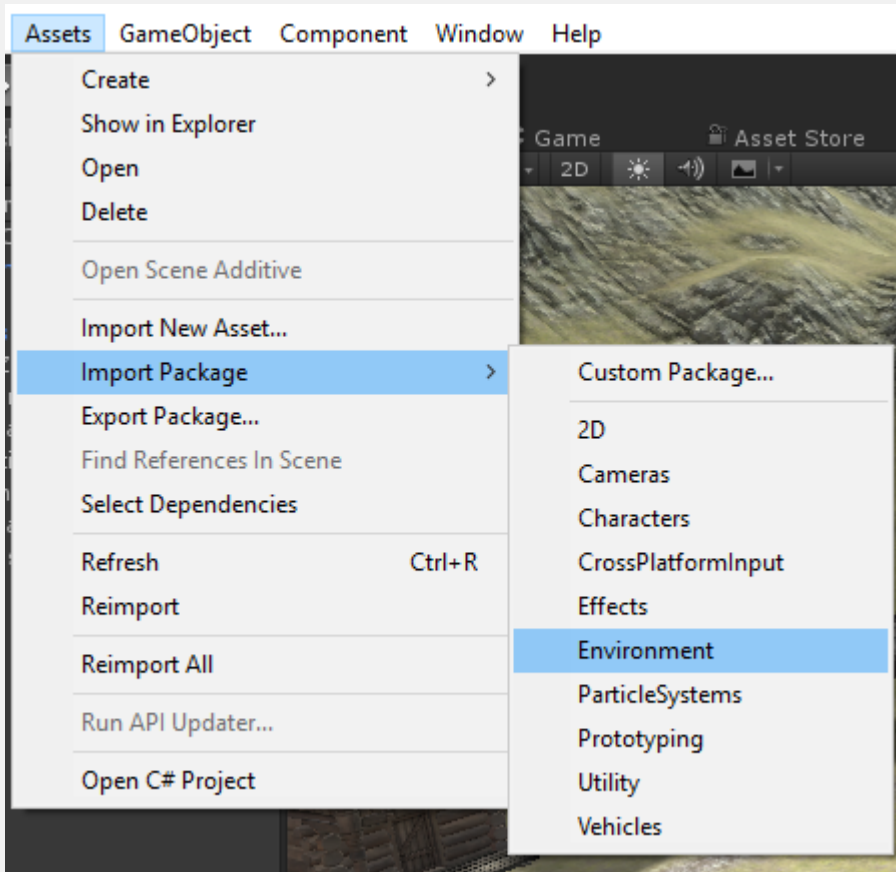

The demo scene includes some free samples from the **Ferns World** and **Rustic grass** packages of Turboscalpeur.
